The survey asked citizens what facilities they wanted added to the Tyler park system. Twenty eight suggestions were listed and each person was to choose their top five choices and rank them with one being the highest and five being the lowest. Each number was then awarded points to create a weighted score. If a one was chosen, it was worth five points, if a two was chosen, it was worth four points, if a three was chosen, it was worth three points...etc. The following table represents the rank and weighted scores of the facility priorities desired by residents.
